## AIMS AND SCOPE

Turkish Medical Student Journal (TMSJ), first and only indexed medical student journal in Turkey, has been publishing manuscripts from Turkey and all around the world since its establishment. All our editorial processes are run by medical students from the editorial board. Our aim is to encourage all students from health sciences to conduct and publish their valuable researches. TMSJ publishes original articles, reviews and case reports regarding all fields of medicine. The primary objective is to publish manuscripts with high scientific/ethical quality and serve a good example for those who plan to build a career in health sciences. TMSJ believes that quality of publication will contribute to the progress of medical sciences as well as encourage medical students to think critically and share their hypotheses and research results internationally.

The journal is published every four months. The language of the publication is English.

The Editorial Board of TMSJ and the publisher follows the principles of the International Council of Medical Journal Editors (ICMJE). Only unpublished papers that are not under review for publication elsewhere can be submitted. The authors are responsible for the scientific content of the material to be published. TMSJ reserves the right to request any research materials on which the paper is based.

Turkish Medical Student Journal does not charge any article submission, article-editorial processing, or publication charges such as page or color charges. TMSJ is a non-profit journal that does not accept any advertisements and financial support from any person or foundation. TMSJ is available as a hard copy. All articles can be downloaded in PDF format from our website, free of charge. There are also no publication fees. Readers are free to share, copy and redistribute the material in any medium or format with the extent of Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND 4.0).

Turkish Medical Student Journal is a non-profit journal which does not accept any advertisements and financial support from any person or foundation.

## MISSION

Turkish Medical Student Journal is an independent, non-profit, peer-reviewed, international, open-access journal; which aims to publish articles of interest to physicians, scientists, and medical students. TMSJ is published three times a year, in February, June, and October by Trakya University. The language of publication is English. Correspondent authors of the articles should be a medical student.

Turkish Medical Student Journal publishes original researches, interesting case reports, and reviews regarding all fields of medicine. All of the published articles are open-access and reachable on our website. The primary aim of the journal is to publish original articles with high scientific and ethical quality and serve as a good example of medical publications for stimulating students, doctors, researchers. Our mission is to feature quality publications that will contribute to the progress of medical sciences as well as encourage medical students to think critically and share their hypotheses and research results internationally.

The Editorial Board and the Publisher adheres to the principles of International Council of Medical Journal Editors (ICMJE), Committee on Publication Ethics (COPE).

## OPEN ACCESS STATEMENT

Turkish Medical Student Journal is a fully open access journal that provides free and unrestricted online availability to its content immediately upon publication without delay. This means;

1. all content is available without charge to the user or her/his institution;
2. everyone has free and unlimited access to the full-text of all articles without subscription;
3. all articles are released immediately in open access format (no embargo period);
4. everyone is allowed to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited. The copyright holder of a scholarly work grants usage rights to others using an open license. TMSJ applies the Creative Commons Attribution (CC BY-NC-ND 4.0) license to its published articles. Authors that submit their papers for publication thereby agree to have the CC BY-NC-ND 4.0 license applied to their works.

The authors retain all patent, and other proprietary rights to the article, including copyright without any restrictions. In addition to non-exclusive rights the publisher has under the CC-BY-NC-ND license, copyright policy also authorizes the publisher to permit commercial use or derivation of the content as well as publication, republication in electronic and print format in the journal, and distribution of the content.

This is in accordance with the Budapest Open Access Initiative which can be assessed at the URL <https://www.budapestopenaccessinitiative.org/>.

## PERMISSIONS

Under Open Access license, no special permission is required to copy, distribute or reuse all or part of article published by TMSJ, including figures and tables, for non-commercial purposes for free as long as the author and original source are properly cited. Reuse of an article does not imply endorsement by the authors or TMSJ.

## EDITORIAL PROCESS

All manuscripts submitted for publication are reviewed for their originality, methodology, importance, quality, ethical nature, and suitability for the journal by the editorial board and briefly revised by the advisory board concerning their field of specialty. A well-constructed scheme is used for the evaluation process. All manuscripts are reviewed by two different members of the editorial board, followed by two peer revisions by members of advisory board or professors, from different institutions, who are experts in their fields. The editors assist authors in the process of improving the quality of their paper. The editor-in-chief has full authority over the editorial, scientific content, and the timing of publication.

## **ETHICS**

Turkish Medical Student Journal depends on publication ethics to ensure all articles published in TMSJ are acceptable in terms of scientific ethical standards and do not include any kind of plagiarism. TMSJ expects authors and the editorial board to adhere the principles of the Committee on Publication Ethics (COPE). To reach the highest standards, TMSJ has an advisory board member who is a professional in ethics.

All original articles submitted to the TMSJ have to be approved by an ethical committee and include the name of the ethics committee(s) or institutional review board(s), the number/ID of the approval(s). Additionally, informed consent documents obtained from patients involving case reports are required for the submission.

All received manuscripts are screened by plagiarism software (iThenticate). Similarity percentages more than 21 (or more than 5 for one paper) and six consecutive words cited from another published paper in the same order are the causes of immediate rejection.

## **MATERIAL DISCLAIMER**

All opinions, reports, and results within the articles that are published in the TMSJ are the personal opinions of the authors. The Editorial Board, the editorial advisory board, the publisher and the owner of the TMSJ do not accept any responsibility for these articles.

## **CONFLICT OF INTEREST POLICY**

The Turkish Medical Student Journal editorial review process pursues the Good Editorial Practice set by international editorial organizations (ICMJE, EASE, WAME, COPE, CSE,...). According to the WAME; a conflict of interest arises when an author, peer-reviewer, or editor in the publication process has an incompatible interest that could unmeritedly influence his or her responsibilities (academic honesty, unbiased conduct, and reporting of research and transparency) in the publication process.

If a conflict of interest related to family, personal, financial, political, or religious issues, as well as any competing interest outlined above at the WAME's definition, exists; TMSJ requires that the author should report the condition to the editorial board and declare at the ICMJE Conflict of Interest form, and specifically define it under a title at the end of the manuscript. The Editorial Board members of the TMSJ may also submit their own manuscripts to the journal as all of them are active researchers. Nevertheless, they cannot take place at any stage on the editorial evaluation of their

manuscripts in order to minimize any possible bias. These manuscripts will be treated like any other author's, final acceptance of such manuscripts can only be made by at least two positive recommendations of external peer-reviewers.

Turkish Medical Student Journal follows a double-blinded review principle. Authors cannot contact any of the peer-reviewers during the publication process and vice versa; since any of the peer-reviewers and author's information are obscured.

For the instructions and further information please visit:

<https://publicationethics.org/competinginterests>

<http://icmje.org>

<https://www.ease.org.uk/publications/science-editors-handbook/>

<https://www.councilscienceeditors.org>

## **WITHDRAWAL POLICY**

Turkish Medical Student Journal encourages authors to follow best practice in publication ethics. Therefore, the authors may withdraw their manuscripts in absolutely necessary conditions. If authors want to withdraw their manuscript, they need to submit the "Manuscript Withdrawal Form". Authors should state their reason of withdrawal and the form need to be signed by all authors, sent to [tmsj@trakya.edu.tr](mailto:tmsj@trakya.edu.tr).

Turkish Medical Student Journal's Editorial Board evaluates the form and if the reason for withdrawal is found as reasonable, the authors will receive a confirmation e-mail. Before getting this confirmation e-mail, the authors should not consider their manuscripts as withdrawn.

## **COPYRIGHT POLICY AND RIGHTS OF AUTHORS**

All articles that are accepted by the TMSJ, will be licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND 4.0) which allows third parties to freely access, use, and share the material for only non-commercial purposes by giving the appropriate credit to the original work. This also allows others to freely access, copy, and use research provided. Adaptation and modification of the material is not permitted. For further details of the license CC BY-NC-ND 4.0, please visit <https://creativecommons.org/licenses/by-nc-nd/4.0/>

The authors retain all patent, and other proprietary rights to the article, including copyright without any restrictions. In addition to the non-exclusive rights the publisher has under the CC-BY-NC-ND 4.0 license, the copyright policy also authorizes the publisher to permit the commercial use or derivation of the content as well as publication, republication in electronic and print format in the journal, and distribution of the content.

## EDITORIAL

Dear readers,

I would like to present to you TMSJ's October issue of 2021. In this issue, you will find 11 articles: consisting of 1 editorial, 3 reviews, 4 original articles, and 3 case reports. Below you can find information about these articles.

Postpartum thyroiditis is the most common endocrine disorder associated with pregnancy. Therefore, Çelik et al. want to draw attention to postpartum thyroiditis, which is an important disease since it is the most common pregnancy-related endocrine disorder that occurs in women in the postpartum period, is seen in approximately 8% of pregnancies, and is usually not symptomatic in the first six weeks postpartum. Güvenç et al. aim to discuss to questions such as whether estrogen hormone therapy is effective on coronary artery calcification and whether there is a relationship between coronary artery calcification and osteoporosis in post-menopausal woman. Molecular mechanisms of the effects of estrogen on coronary artery calcification and osteoporosis should be understood thoroughly to answer these questions. Therefore, they focused on the molecular mechanisms of estrogen on coronary artery calcification and osteoporosis, and they explained the efficiency of estrogen hormone therapy on coronary artery calcification in post-menopausal women. Cengiz et al. want to show the effects of deficiencies of some vitamins and minerals, effects of vegetarian diet on the cardiovascular system, possible effects of vegetarian diet on cardiac diseases, as well as the effects of soy protein, which is consumed by vegetarians, on heart function are investigated.

İzzettinoğlu et al. aim to clinically and histopathologically examine eyelid lesions and evaluate the consistency of clinical examination by comparing the provisional diagnoses of patients with their postoperative histopathology results. Kılıççalan et al. aim to reveal the effects of acyclovir on angiogenesis and to assess the experimental doses. İzzettinoğlu et al. want to analyze the clinical characteristics, examination findings, and outcomes of the patients diagnosed with phacomorphic glaucoma in the tertiary ophthalmology clinic of Trakya University Hospital. Bardakçı et al. share their findings on the evaluation of demographic, clinic and genetic characteristics of patients admitted to Trakya University Hospital with hypertrophic cardiomyopathy.

Of our 3 case reports, Kavakbasi et al. report the case of a 58-year-old female patient with treatment-refractory depression and post-traumatic stress disorder, who responded neither to unilateral electroconvulsive therapy nor to multiple antidepressant agents during several inpatient treatments. However, she achieved remission after bilateral electroconvulsive therapy. Özyiğit et al. present a case of a heart failure patient with a hydatid cyst of the lung, mimicking a phantom tumor. Peripartum cardiomyopathy is a rarely seen pregnancy-related myocardial disorder. The diagnosis is usually challenging and is made by exclusion. Yüksel et al. share a case of a patient with peripartum cardiomyopathy as a result of a successful treatment plan.

We are proud to present you the last issue of 2021. After this issue, my duty as Editor-in-chief in TMSJ comes to an end. I hand over my duty to Beliz Koçyiğit. I sincerely believe that they will do great things.

**Hilal Sena Çifcibaşı**
