Aims and Scope

Turkish Medical Student Journal (TMSJ) is the first scientific journal in Türkiye to be run by medical students and to publish works of medical students only. In that respect, TMSJ encourages and enables all students of medicine to conduct research and to publish their valuable research in all branches of medicine.

Turkish Medical Student Journal publishes researches, interesting case reports and reviews regarding all fields of medicine. The primary aim of the journal is to publish original articles with high scientific and ethical quality and serve as a good example of medical publications for those who plan to build a career in medicine. TMSJ believes that quality of publication will contribute to the progress of medical sciences as well as encourage medical students to think critically and share their hypotheses and research results internationally.

The journal is published every four months. The language of publication is English.

The Editorial Board of TMSJ and the Publisher follows the principles of the International Council of Medical Journal Editors (ICMJE). Only unpublished papers that are not under review for publication elsewhere can be submitted. The authors are responsible for the scientific content of the material to be published. TMSJ reserves the right to request any research materials on which the paper is based.

Turkish Medical Student Journal does not charge any article submission, article-editorial processing, or publication charges such as page or color charges. TMSJ is a non-profit journal that does not accept any advertisements and financial support from any person or foundation. TMSJ is available as a hard copy. All articles can be downloaded in PDF format from our website, free of charge. There are also no publication fees. Readers are free to share, copy and redistribute the material in any medium or format with the extent of Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND 4.0).

Turkish Medical Student Journal is a non-profit journal which does not accept any advertisements and financial support from any person or foundation.

MISSION

Turkish Medical Student Journal is an independent, non-profit, peer-reviewed, international, open-access journal; which aims to publish articles of interest to physicians, scientists, and medical students. TMSJ is published three times a year, in February, June, and October by Trakya University. The language of publication is English. Correspondent authors of the articles should be medical students.

Turkish Medical Student Journal publishes original researches, interesting case reports, and reviews regarding all fields of medicine. All of the published articles are open-access and reachable on our website. The primary aim of the journal is to publish original articles with high scientific and ethical quality and serve as a good example of medical publications for stimulating students, doctors, researchers. Our mission is to feature quality publications that will contribute to the progress of medical sciences as well as encourage medical students to think critically and share their hypotheses and research results internationally.

The Editorial Board and the Publisher adheres to the principles of ICMJE Committee on Publication Ethics (COPE).

Editorial Policy

OPEN ACCESS STATEMENT

Turkish Medical Student Journal is a fully open access journal that provides free and unrestricted online availability to its content immediately upon publication without delay. This means;

1. all content is freely and limitlessly available without charge to the user or her/his institution;
2. everyone has free and unlimited access to the full-text of all articles without subscription;
3. all articles are released immediately in open access format (no embargo period);
4. everyone is allowed to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited. The copyright holder of a scholarly work grants usage rights to others using an open license. Turkish Medical Student Journal applies the Creative Commons Attribution (CC BY-NC-ND 4.0) license to its published articles. Authors that submit their papers for publication thereby agree to have the CC BY-NC-ND 4.0 license applied to their works.

The authors retain all patent, and other proprietary rights to the article, including copyright without any restrictions. In addition to non-exclusive rights the publisher has under the CC-BY-NC-ND license, copyright policy also authorizes the publisher to permit commercial use or derivation of the content as well as publication, republication in electronic and print format in the journal, and distribution of the content.

This is in accordance with the Budapest Open Access Initiative which can be assessed at the URL:

<http://www.budapestopenaccessinitiative.org/>.

PERMISSIONS

Under Open Access license, no special permission is required to copy, distribute or reuse all or part of article published by Turkish Medical Student Journal, including figures and tables, for non-commercial purposes for free as long as the author and original source are properly cited. Reuse of an article does not imply endorsement by the authors or Turkish Medical Student Journal.

EDITORIAL PROCESS

All manuscripts submitted for publication are reviewed for their originality, methodology, importance, quality, ethical nature, and suitability for the journal by the editorial board and briefly revised by the advisory board whose members are respected academicians in their fields. A well-constructed scheme is used for the evaluation process. All manuscripts are reviewed by two different members of the editorial board, followed by peer revision from at least two professors, belonging to different institutions, who are experts in their areas. The editors assist authors to improve the quality of their papers. The editor-in-chief has full authority over the editorial, scientific content, and the timing of publication.

ETHICS

Turkish Medical Student Journal depends on publication ethics to ensure all articles published in TMSJ are acceptable in terms of scientific ethical standards and do not include any kind of plagiarism. TMSJ expects authors and the editorial board to adhere the principles of the COPE. To reach the highest standards, TMSJ has an advisory board member who is a professional in ethics.

All original articles submitted to the TMSJ have to be approved by an ethical committee and include the name of the ethics committee(s) or institutional review board(s), the number/ID of the approval(s). Additionally, informed consent documents obtained from patients involving case reports are required for the submission.

All received manuscripts are screened by plagiarism software (iThenticate). Similarity percentages more than 19 (or more than 5 for one paper) and six consecutive words

cited from another published paper in the same order are the causes of immediate rejection.

MATERIAL DISCLAIMER

All opinions, reports, and results within the articles that are published in the TMSJ are the personal opinions of the authors. The Editorial Board, the editorial advisory board, the publisher and the owner of the TMSJ do not accept any responsibility for these articles.

CONFLICT OF INTEREST POLICY

The Turkish Medical Student Journal's editorial review process pursues the Good Editorial Practice set by international editorial organizations (ICMJE, EASE, WAME, COPE, CSE,...). According to the WAME; a conflict of interest arises when an author, peer-reviewer, or editor in the publication process has an incompatible interest that could unmeritedly influence his or her responsibilities (academic honesty, unbiased conduct, and reporting of research and transparency) in the publication process. If a conflict of interest related to family, personal, financial, political, or religious issues, as well as any competing interest outlined above at the WAME's definition, exists; TMSJ requires that the author should report the condition to the editorial board and declare at the ICMJE Conflict of Interest form, and specifically define it under a title at the end of the manuscript. The Editorial Board members of the Turkish Medical Student Journal may also submit their own manuscripts to the journal as all of them are active researchers. Nevertheless, they cannot take place at any stage on the editorial evaluation of their manuscripts in order to minimize any possible bias. These manuscripts will be treated like any other author's, final acceptance of such manuscripts can only be made by at least two positive recommendations of external peer-reviewers.

Turkish Medical Student Journal follows a double-blinded review principle. Authors cannot contact any of the peer-reviewers during the publication process and vice versa; since any of the peer-reviewers and author's information are obscured.

WITHDRAWAL POLICY

Turkish Medical Student Journal encourages authors to follow best practice in publication ethics. Therefore, the authors may withdraw their manuscripts in absolutely necessary conditions. If authors want to withdraw their manuscript, they need to submit the "Manuscript Withdrawal Form". Authors should state their reason of withdrawal and the form needs to be signed by all authors, sent to tmsj@trakya.edu.tr.

Turkish Medical Student Journal Editorial Board evaluates the form and if the reason for withdrawal is found as reasonable, the authors will receive a confirmation e-mail. Before getting this confirmation e-mail, the authors should not consider their manuscripts as withdrawn.

COPYRIGHT POLICY AND RIGHTS OF AUTHORS

All articles that are accepted by the Turkish Medical Student Journal, will be licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International License (CC BY-NC-ND 4.0) which allows third parties to freely access, use, and share the material for only non-commercial purposes by giving the appropriate credit to the original work. This also allows others to freely access, copy, and use research provided. Adaptation and modification of the material is not permitted. For further details of the license CC BY-NC-ND 4.0, please visit <https://creativecommons.org/licenses/by-nc-nd/4.0/>

The authors retain all patent, and other proprietary rights to the article, including copyright without any restrictions. In addition to the non-exclusive rights the publisher has under the CC BY-NC-ND 4.0 license, the copyright policy also authorizes the publisher to permit the commercial use or derivation of the content as well as publication, republication in electronic and print format in the journal, and distribution of the content.

Instructions to Authors

PEER REVIEW PROCESS

In TMSJ, all manuscripts are reviewed with a double-blind process, which means that both the author and reviewer identities are concealed from the authors and reviewers. Before the review process, all the details that may give away the authors' identities are removed from the submitted manuscript.

After the completion of the editorial evaluation, the manuscripts are reviewed by two or more external reviewers who are experts in their field. The reviewers are chosen for their interest in the field of articles to be evaluated, academic competence, ability to give constructive feedback, and adherence to ethical principles. This review process usually takes 1 to 2 weeks; however, depending on the reviewer's availability, it may take some more time. The authors will be informed transparently on the given feedback, and the Journal expects changes to be made by the authors within 7 to 15 days.

Turkish Medical Student Journal does not demand any subscription fee or similar payment for access to electronic resources.

The editorial and publication process of Turkish Medical Student Journal is shaped in accordance with the guidelines of the International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Council of Science Editors (CSE), Committee on Publication Ethics (COPE), European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal is in conformity with the Principles of Transparency and Best Practice in Scholarly Publishing.

Authorship contribution form should be filled in by the corresponding author and a signed and scanned version should be submitted during the manuscript submission process in order to act appropriately to authorship rights and prevent ghost or honorary authorship.

Any financial grants or other support received for the study from individuals or institutions should be disclosed to the Editorial Board, and to disclose potential conflicts of interest ICMJE Potential Conflict of Interest Disclosure Form should be filled in and submitted.

The authors transfer all copyrights of their manuscripts within the scope of local and international laws to the journal as of submission. For this purpose, the copyright transfer form should be signed by all contributing authors, and a scanned version of the form should be submitted with the manuscript. The wet signed version of the form should be posted to the Editorial Office. The financial and legal responsibilities of a manuscript, including the text, tables, images and any other content that may be subject to international or local copyrights belong to the authors.

Artificial Intelligence (AI)

Turkish Medical Student Journal adopts the WAME recommendations on ChatGPT and Chatbots related to scientific publications:

- Chatbots cannot be authors
- Authors should be transparent when chatbots are used and provide information about how they were used
- Authors are responsible for the work performed by a chatbot in their paper (including the accuracy of what is presented, and the absence of plagiarism) and for appropriate attribution of all sources (including for material produced by the chatbot)

Manuscripts can be submitted through Manuscript Manager online submission and evaluation system.

ARTICLE TYPES

The manuscripts should be prepared in accordance with ICMJE-Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals.

The plagiarism software iThenticate report of the manuscript must also be uploaded together with the manuscript while submitting to the Turkish Medical Student Journal. The articles that indicate a similarity rate of more than 20 %, according to iThenticate reports will not be accepted.

The Journal publishes the following types of articles:

Original Research Articles: Original prospective or retrospective studies of basic or clinical investigations in areas relevant to medicine.

Content:

- Abstract (average 400 words; the structured abstract contains the following sections: aims, methods, results, conclusion)
- Introduction
- Material and Methods
- Results
- Discussion
- Conclusion
- References

Review and Mini Review Articles: The authors may be invited to write or may submit a review article. Reviews including the latest medical literature may be prepared on all medical topics.

Content:

- Abstract (average 400 words; without structural divisions)
- Titles on related topics
- References

Case Reports: Brief descriptions of a previously undocumented disease process, a unique unreported manifestation or treatment of a known disease process, or unique unreported complications of treatment regimens. They should include an adequate number of photos and figures.

Content:

- Abstract (average 200 words)
- Introduction
- Case Report
- Discussion
- References

Letters to the Editor: These are the letters that include different views, experiments and questions of the readers about the manuscripts that were published in this journal in the recent year and should be no more than 500 words.

Content:

- There's no title and abstract.
- Submitted letters should include a note indicating the attribution to an article (with the number and date) and the name, affiliation and address of the author(s) at the end.
- The answer to the letter is given by the editor or the author(s) of the manuscript and is published in the journal.

MANUSCRIPT PREPARATION

Authors are encouraged to follow the following principles before submitting their material.

-The article should be written in IBM compatible computers with Microsoft Word.

ABBREVIATIONS: All abbreviations in the text must be defined the first time they are used, and the abbreviations should be displayed in parentheses after the definition. Authors should avoid abbreviations in the title, abstract and at the beginning of the first sentences of the paragraphs.

FIGURES AND TABLES:

-All figures and tables should be cited at the end of the relevant sentence. Explanations must be placed at the bottom of figures, whereas at the top of tables.

Instructions to Authors

-Figures and tables must be added to the e-mail as attachments in .jpg or .tiff formats.

- The name of the file should be named as: last name of the first author_Table/ Figure_No.TIFF/JPEG. For example: Sancar_Figure_1.JPEG.

- All abbreviations used, must be listed in explanation which will be placed at the bottom of each figures and tables.

- For figures and tables to be reproduced relevant permissions need to be provided. This permission must be mentioned in the explanation.

- Pictures/photographs must be in color, clear and with appropriate contrast to separate details.

TITLE PAGE: A concise, informative title, should be provided. All authors should be listed with academic degrees, affiliations, addresses, office and mobile telephone and fax numbers, e-mail and postal addresses, ORCID. If the study was presented in a congress, the author(s) should identify the date/place of the congress of the study presented.

ABSTRACT: The abstracts should be prepared in accordance with the instructions in the "Categories of Articles" and placed in the article file.

KEYWORDS:

- Keywords should be a minimum of 3, and a maximum of 5.

- Keywords should be appropriate to "Medical Subject Headings (MESH)"

ACKNOWLEDGEMENTS: Conflict of interest, financial support, grants, and all other editorial (statistical analysis, language editing) and/or technical assistance if present, must be presented at the end of the text.

REFERENCES: References should be numbered in the order they are cited. Only published data or manuscripts accepted for publication and recent data should be included. Inaccessible data sources and those not indexed in any database should be omitted. Titles of journals should be abbreviated in accordance with Index Medicus-NLM Style (Patrias K. Citing medicine: the NLM style guide for authors, editors, and publishers [Internet]. 2nd ed. Wendling DL, technical editor. Bethesda (MD): National Library of Medicine (US); 2007 - [updated 2011 Sep 15; cited Year Month Day] (<http://www.nlm.nih.gov/citingmedicine>). All authors should be listed if an article has three or less authors; first three authors are listed and the rest is represented by "et al.". Reference format and punctuation should be as in the following examples.

Journal: Muller C, Buttner HJ, Peterson J et al. A randomized comparison of clopidogrel and aspirin versus ticlopidine and aspirin after placement of coronary artery stents. *Circulation* 2000;101(6):590-3.

Book Section: Sherry S. Detection of thrombi. In: Strauss HE, Pitt B, James AE, editors. *Cardiovascular Medicine*. St Louis: Mosby; 1974.p.273-85.

Books with Single Author: Cohn PF. *Silent myocardial ischemia and infarction*. 3rd ed. New York: Marcel Dekker; 1993.

Editor(s) as author: Norman IJ, Redfern SJ, editors. *Mental health care for elderly people*. New York: Churchill Livingstone; 1996.

Conference Proceedings: Bengtsson S, Sotheman BG. Enforcement of data protection, privacy and security in medical informatics. In: Lun KC, Degoulet P, Piemme TE, Rienhoff O, editors. *MEDINFO 92. Proceedings of the 7th World Congress on Medical Informatics*; 1992 Sept 6-10; Geneva, Switzerland. Amsterdam: North-Holland; 1992.p.1561-5.

Scientific or Technical Report: Smith P, Golladay K. Payment for durable medical equipment billed during skilled nursing facility stays. Final report. Dallas (TX) Dept.

of Health and Human Services (US). Office of Evaluation and Inspections: 1994 Oct. Report No: HHSIGOE 169200860.

Thesis: Kaplan SI. Post-hospital home health care: the elderly access and utilization (dissertation). St. Louis (MO): Washington Univ. 1995.

Manuscripts accepted for publication, not published yet: Leshner AI. Molecular mechanisms of cocaine addiction. *N Engl J Med* In press 1997.

Epub ahead of print Articles: Aksu HU, Ertürk M, Gül M et al. Successful treatment of a patient with pulmonary embolism and biatrial thrombus. *Anadolu Kardiyol Derg* 2012 Dec 26. doi: 10.5152/akd.2013.062. [Epub ahead of print]

Manuscripts published in electronic format: Morse SS. Factors in the emergence of infectious diseases. *Emerg Infect Dis* (serial online) 1995 Jan-Mar (cited 1996 June 5): 1(1): (24 screens). Available from: URL:<http://www.cdc.gov/ncidod/EID/cid.htm>.

CONFLICT OF INTEREST STATEMENT

Conflict of interest is when the author's primary responsibility to science, ethics and readers is not compatible with author's private interests such as financial gains or personal rivalry. Credence of the scientific process and the authenticity of articles depend in part on how transparently conflicts of interest are approached. In case of a conflict of interest it should be declared to the editorial board of TMSJ, and clearly written under a particular section at the end of the manuscript. Authors may reach more information and find the instructions by COPE and ICMJE conflicts of interest guidelines.

ORCID

It is recommended that the journals, which are indexed in TR Index or apply to take a part, require ORCID® information from the authors and include this information in the journal/articles. ORCID® is the abbreviation for Open Researcher and Contributor ID. ORCID® is a 16-digit URI compliant with the ISO Standard (ISO 27729), also known as the International Standard Name Identifier (ISNI). The correspondent author who will submit an article to our journal should state ORCID® numbers. Researchers who do not have ORCID® ID can apply for a free registration and get their individual ORCID® number at <http://orcid.org>.

WITHDRAWAL POLICY

Turkish Medical Student Journal encourages authors to follow best practice in publication ethics. Therefore, the authors may withdraw their manuscripts in absolutely necessary conditions. If authors want to withdraw their manuscript, they need to submit the "Manuscript Withdrawal Form". Authors should state their reason of withdrawal and the form needs to be signed by all authors, sent to info@turkmedstudj.com.

TMSJ Editorial Board evaluates the form and if the reason for withdrawal is found as reasonable, the authors will receive a confirmation e-mail. Before getting this confirmation e-mail, the authors should not consider their manuscripts as withdrawn.

COMPLAINT

All of the complaints regarding the articles should be stated via e-mail to info@turkmedstudj.com. TMSJ Editorial Board evaluates the complaints with the accordance of COPE Guidelines and draws a conclusion after the decision of Editor-in-Chief.
